

Day 4 Hackathon Completed! 🚀

Excited to share that I successfully built dynamic frontend components for a marketplace project under the mentorship of Sir Ameen Alam.

Highlights:

Created a dynamic product grid with API integration.

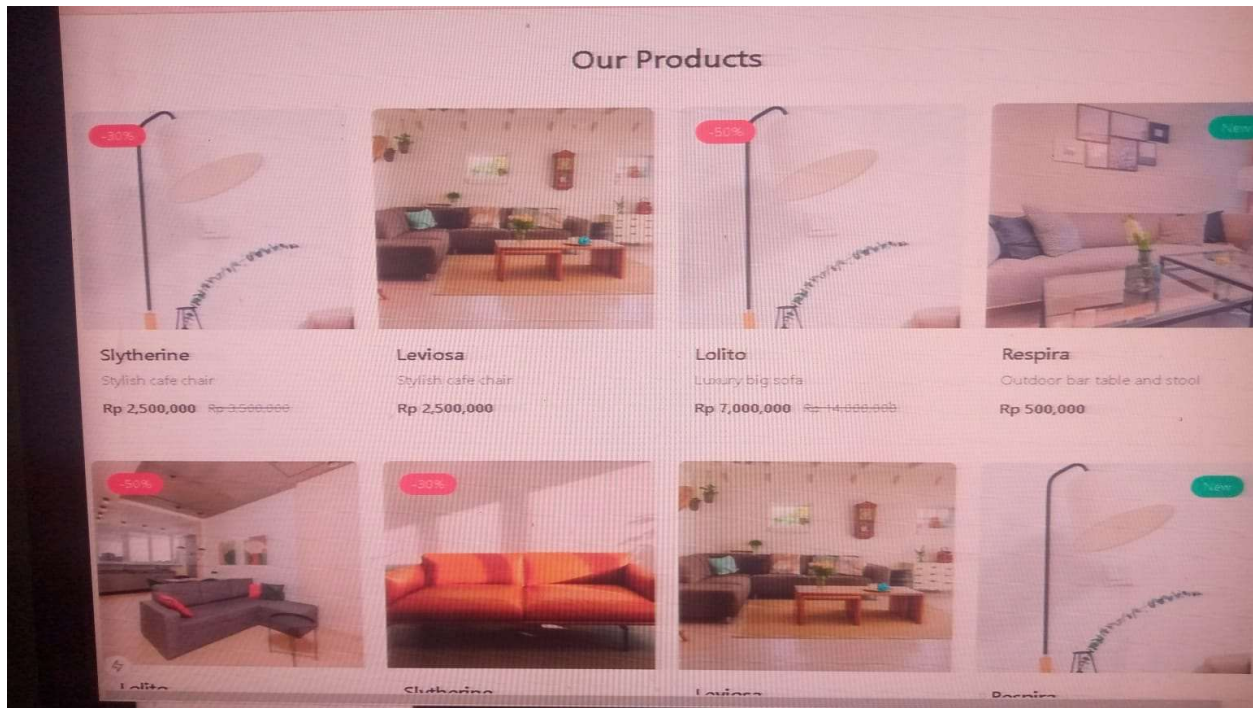

Developed real-time product detail pages with Next.js.

Built essential components: Search Bar, Cart, Filter, Wishlist, Checkout Flow.

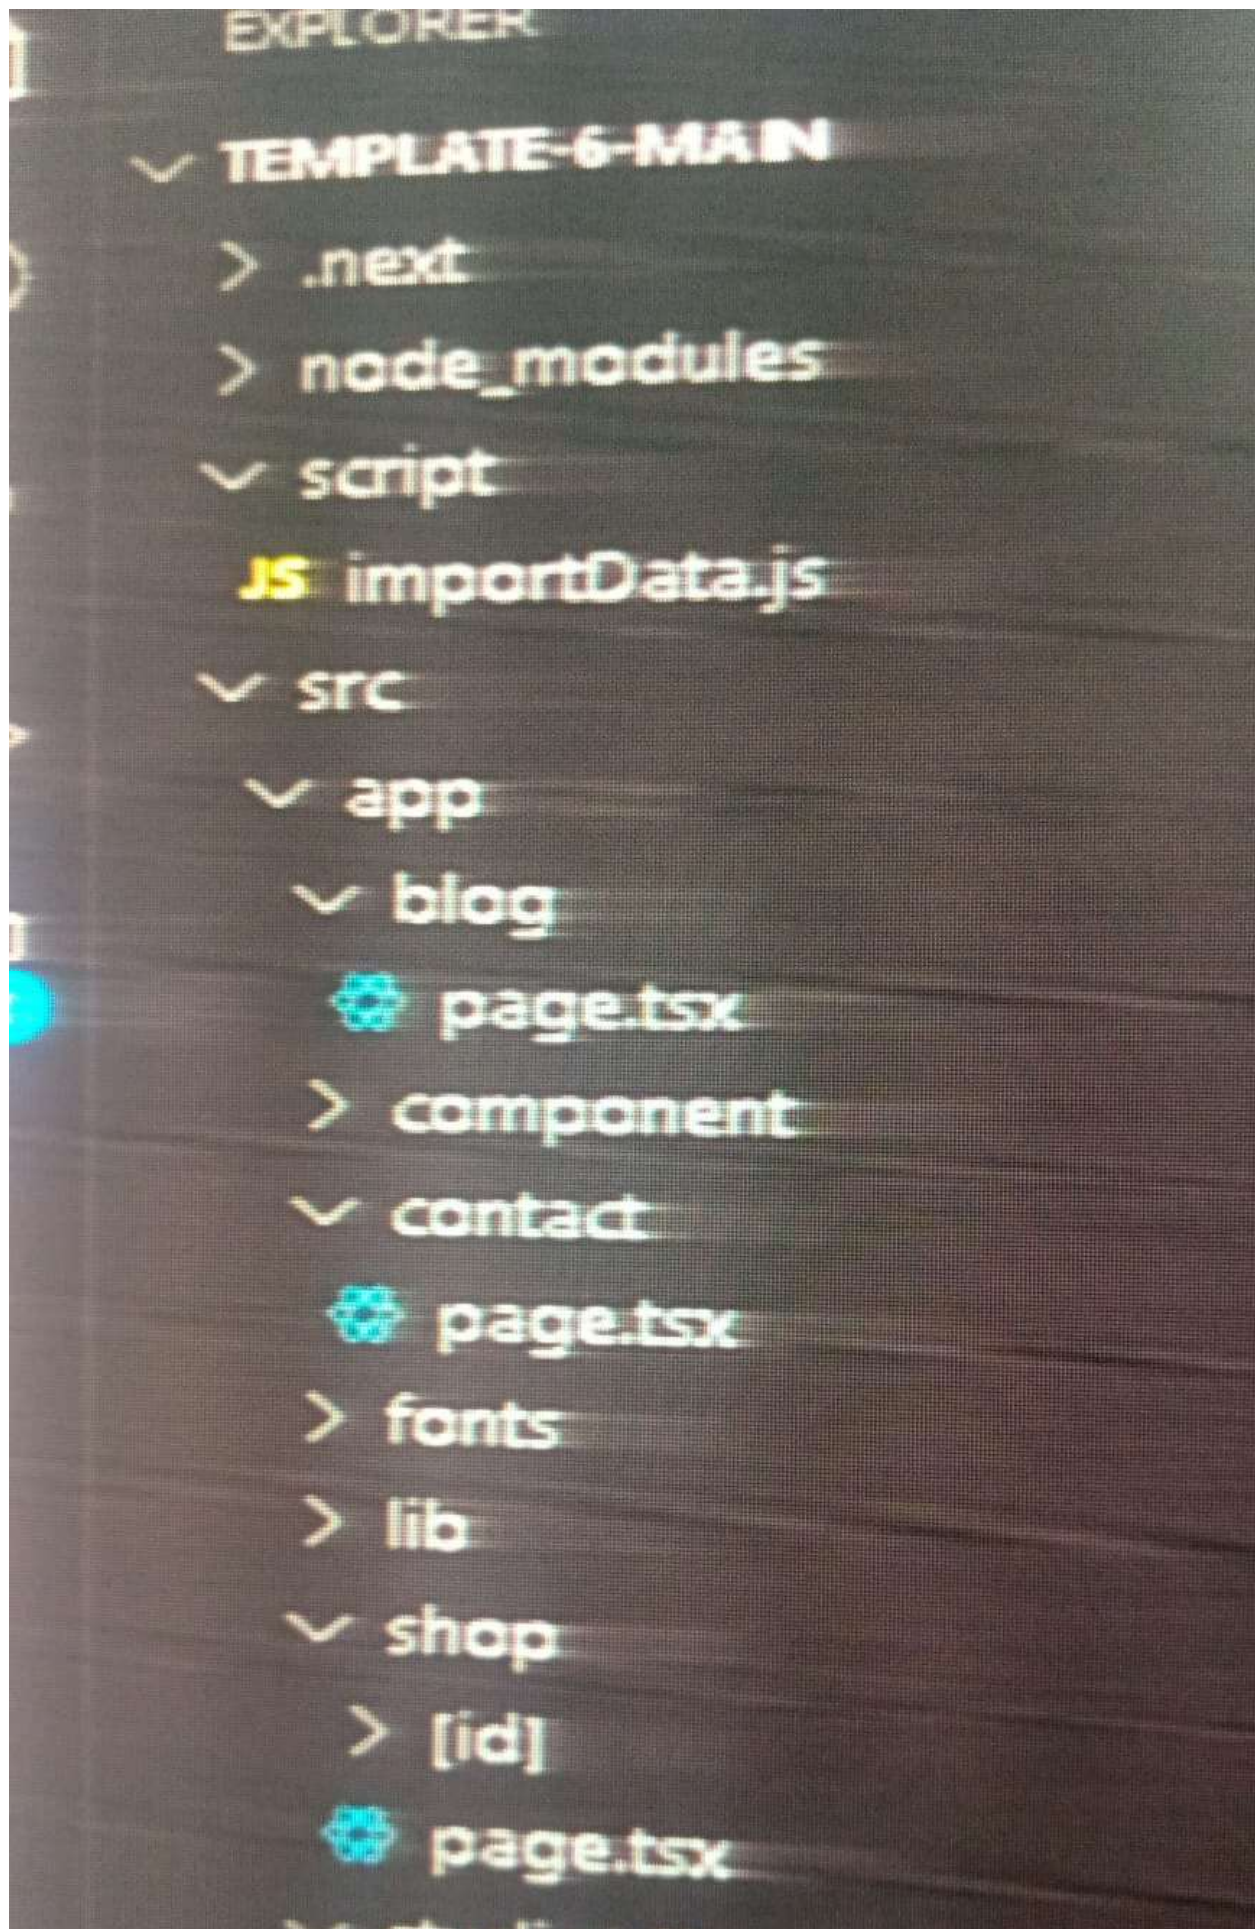

Focused on responsive design, reusable components, and state management.

🔧 Tech Used: Next.js, React, Tailwind CSS, Sanity CMS.
